做了整整三十五年的中學老師，我可以說我這一輩子過得非常充實，非常有意義。

我到現在還記得我開始作中學老師的那一年，我一畢業，就在一所明星中學去教數學，學生完全是經過精挑細選選出來的，學習不錯，我教起來當然是得心應手，輕鬆得很。隨便我怎麼出題目都考不倒他們。

可是，我忽然注意到班上有一位同學上課似乎非常心不在焉，老是對著天花板發呆。期中考，他的數學只得了十五分，太奇怪了，全班就只有他不及格，而且分數如此之差。

As a middle school teacher for 35 years, I could say that my whole life is very fulfilled and meaningful. I still remember that the year when I started to be a middle school teacher. I taught math at a star middle school as soon as I graduated. The students there were carefully selected, and they did well in the study. Of course it was skillful and easy for me to teach them. I could give them whatever questions and they would not fail.

However, I suddenly noticed that there was a student in the class who seemed to be absent-minded, and he always stared blankly at the ceiling. He only got 15 on his mathematics of mid-term exam, and this was very strange. He was the only one who failed, and his grades were so poor.
