There are many kinds of drinks in convenience stores. When people walk into a convenience store, they are always attracted by soft drinks. People of all ages can almost choose the drinks which they want, and then they feel satisfied with drinking the drinks. Teenagers spend more money buying drinks than adults. They like to buy soda pop, juice, or canned drinks. However, they seldom drink water. Finally, they will put on weight because they have a lot of sugar every day. If you are also one of the teenagers who drink soft drinks instead of water, you had better give up this bad habit.
