### 1150119 高中職生中翻英短文翻譯參考答案

If I were the principal, I would make the school's look become beautiful and make the equipment become advanced. If I were the principal, I would hold special outdoor teaching so that the students could learn different knowledge during the trip and let every student be able to go out happily and go home safely. If I were the principal, I would design a special course; we didn't take classes every day; occasionally, we shall let the students take a breather and they would not be bored with the school; they were able to learn happily and made the learning better.
