然而，因為像有聲書和虛擬助理之類的新科技在人們生活中占據更重要的角色，所以學習點字(Braille)的孩童越來越少了。樂高希望新的點字積木能給盲童一個學習閱讀的有趣方法。每塊積木看起來就像是普通的樂高積木，但其實上面有點字字母(Braille characters)。整套兩百五十塊的積木組將於二〇二〇年推出，將會包含字母、數字和數學符號。這個新玩具進到校園時一定會非常受歡迎。正如以前曾玩過樂高積木的人都知道的——沒有什麼比寓教於樂(learning through play)更棒的了！

However, as new technology such as audiobooks and virtual assistants takes a larger role in people's lives, fewer children are learning Braille. Lego hopes its new Braille bricks will give blind children a fun way to learn to read. Each brick looks like a regular Lego block but is actually made with Braille characters on it. The full 250-piece set will be released in 2020 and will include the alphabet, numbers, and math symbols. The new toys are sure to be a hit when they arrive in schools. As anyone who has ever played with Lego before knows—nothing beats learning through play!
